

Downtown Lowdown

July 4th, 2010

You may have noticed something different as you walk or drive down Main Street- two buildings have received a face lift! Artesia MainStreet was proud to have assisted these two buildings, Simply Bello (323 Main) and the Arts Council Building (510 Main) in their façade improvements. Our Façade Improvement Program matches building and business owners who would like to update their facades, with our grant program. It is a dollar for dollar grant match for building owners and a full grant for business owners. The application process is painless and the results are fabulous! The application is reviewed by our design committee and our Management committee, and then the updates can begin. We are pleased to offer this grant program to those in our district, and provide assistance to the entrepreneurs that make Main Street great.

Have a safe and wonderful 4th of July, and remember to thank our active and veteran military and service personnel for their service to our country. The Sons of Thunder Pyro team have a great show planned for this weekend, so look to the stars for the spectacular annual fireworks taking place Monday night!
